

### Assembly Instructions

- Apply heatsink compound to heatbreak.
- Screw heatbreak into heatsink.
- Screw heater block on to heatbreak, ensure the heater block is in the orientation shown whilst also trying to get the top of the block as close to flush with the break section as possible.
- Screw nozzle into heater block.
- Insert heater cartridge into hole and secure with screw. Ensure heater is centralised in the block and lead exit side is correct.
- Insert sensor cartridge into hole and secure with grubscrew. Ensure lead exit side is correct.
- Run hot tightening cycle.
